Riding escalators: A summer safety reminder

(ARA) - Summer means more time spent out and about. With activities ranging from swimming at the local pool to attending festivals, amusement parks and sporting events, people are visiting new places and entering new buildings. While outdoor safety may be top of mind for many this summer, indoor safety is equally important.

The Elevator and Escalator Safety Foundation and the National Elevator Industry, Inc. remind people to ride safely when using building transportation this summer. EESF and NEII together promote escalator safety rules and encourage building and equipment owners to make riders aware of them.

"Escalators are an extremely safe form of transportation," says Barbara Allen, executive director and spokesperson for EESF. "They transport more than 300 million people in North America daily. However, it's always important to follow simple safety guidelines, and adults, especially, should supervise and set a good example for their children."

Some tips for a safe ride:

When entering escalators:

- * Watch the direction of the moving step and step on and off with extra care.
- * Take care if you are wearing bifocals or similar eyewear.
- * Hold children firmly with one arm or hold child's free hand.
- * Hold small packages firmly in one hand, but always leave one hand available to hold the handrail.
- * Grasp the handrail as you step onto the moving step.
- * Do not go in the opposite direction of the escalator.
- * Do not take wheelchairs, electric scooters, strollers, hand carts, luggage carts or similar items on the escalator.

When riding escalators:

- * Keep loose clothing clear of steps and sides.
- * Wear closed-toed and hard-soled shoes, and avoid wearing footwear made of soft-resin or other rubbery materials.
- * Stand clear of the sides of the escalator.
- * Face forward and hold the handrail for the entire ride.
- * Reposition your hand slowly if the handrail moves slightly ahead or behind the steps.
- * Don't rest any items or parcels on the handrail or lean against the sides.
- * Don't climb onto or ride the handrail.
- * Do not let children sit on steps or stand too close to sides.
- * If children are too small to hold handrail, or holding the handrail pulls them close to the side of the escalator, hold their hand and keep them centered on the step.

When exiting escalators:

- * Don't hesitate. Step off promptly.
- * Make sure to step over the comb fingers; don't let your feet slide off the end of the escalator.
- * Immediately move clear of the escalator exit area; don't stop to talk or look around since other passengers may be behind you.

For more information about escalator safety, visit the NEII Web site at www.neii.org, or the EESF Web site at www.eesf.org. The EESF Web site offers online interactive safety programs for both children and adults.

(ARA) - With summer here and people on the move, the Elevator and Escalator Safety Foundation and the National Elevator Industry, Inc. remind people to ride safely when using building transportation, and encourage building owners to remind riders of escalator safety rules.

When entering escalators:

- * Watch the direction of the moving step and enter with care.
- * Hold children firmly with one hand, leaving one hand free to hold the handrail.
- * Don't take wheelchairs, strollers or similar items on the escalator.

When riding escalators:

- * Stand in the center and keep loose clothing away from steps and sides.
- * Wear closed-toed, hard-soled shoes; avoid footwear made from rubbery materials.
- * Don't climb/rest any items on the handrail.

When exiting escalators:

- * Don't hesitate.
- * Step directly over the comb fingers.
- * Immediately move clear of the escalator exit area.

For more information, visit www.neii.org or www.eesf.org and find interactive safety programs for both children and adults.
